The repair work was completed in the early morning hours shortly after the damage which did not rise to a level to be considered reportable. A contractor working for the city, AA Asphaltng, LLC 14720 Puyallup St, Sumner WA 98390 AAASPI* 223DF (253) 939-0214; hit the gas service line while completing concrete work.
05-01-2020	Anthony Dorrrough	PSE - King Co. West - 7915	Main Extension	Chad Leonard	Infrasource	Staff observed crew in the process of installing new 2-inch PE main extension to three new const structures located on the same lot. They were tying into an existing 2-inch PE main that was inserted into 4-inch CI pipeline. The new main will be inserted into an 8-inch PVC casing provided by the customer. Also on site: Laborer/Kyle Harrington. Staff noted that the maps provided to the contractor were not up to date or accurate, they indicated that the existing gas main was inserted into an 8-inch CI casing and that there was another existing 16-inch gas pipeline nearby. The crew found an existing 4-inch CI gas main but were unable to locate the 16-inch gas main, which the crew surmised may be because it is located greater than a 4-ft depth. Staff felt these mapping discrepancies did not rise to the level needing follow-up.

ANNUAL REPORT: ACCURACY/TRENDS

Question #1.

Was the Annual Report reviewed for accuracy and trends? If any trends were discovered, please describe.

1. Result

Satisfactory

1. Notes

Reviewed annual reports. No identifiable trends.

operator identified trend of 5 year avg. of new buried meters found. (possibility of becoming an accerlated action)

6. Notes

Missing or incorrect locates is an area of high emphasis. Increased training and transitioning to one year OQ re-certifications (previously 3 year cycle). Expected to be fully functional by June 2022.

Evacuations are number one reason for reporting. 59 out of 78 for 2020 were due to evacuations. Uncontrolled release was number two with 12 out of 78. Same trend pattern for all incidents during 2018-2020 period.

Question #7.

Were there reportable or unreportable safety related conditions during the previous year? If yes please describe.

Q7: Report of SRCs

NotificationID	Company	Safety-Related Condition	SafetyRelatedConditionChoices	Reportable?	Date & Time of Incident	Company Notified Date	Report Date
Puget Sound Energy (2 Incident notifications)

2600	Puget Sound Energy	✓		State Reportable	03-28-2013 04:46 PM		

7. Result
Not Applicable

7. Notes

No SRC's for 2020 time period.

Question #8.

For transmission systems, were there any abnormal operating conditions (as described in 192.605 (c) or 195.402(d)) since the last annual review? If yes please describe.

8. Result
Not Applicable

8. Notes

NO transmission SRC's for 2020.

O&M & EMERGENCY PROGRAMS

Question #9.

Is the O&M Manual up to date and were changes made in the previous year?

Operator Manuals on Sharepoint

9. Result
Satisfactory

9. Notes

New versions are published on March 1st every year.

Reviewed March 1, 2020 manual updates

Operator has started referencing second set of Covered Tasks (ASME versions)

Plastic pipe rule changes:

2450.1000 - Qualifying and marking pipeline components. (marking of components with ASTM standards)

2500.1600 - gas map distribution (cleaned up language to refer to digital resources as opposed to hard copies)

2525.1150 - Pipeline design (updated due to plastic pipe rule. Design factors changes)

2525.2800 - Instrument and control pipe design and installation (anodeless riser in control pipe setting)

2525.3600 - deactivation of pipelines (new section 7 for valve and CP boxes)

2550.1000 - meter set assembly design (over pressure protection considerations added)

Question #10.

If changes to the O&M were made, are changes acceptable?

10. Result
Satisfactory

10. Notes

Changes appear acceptable and are readily available for review.

Question #11.

Were emergency plans changed during the previous year?

11. Result

Satisfactory

11. Notes

No significant changes to GFP.

Logistics and safety emphasis was focus of changes for field personnel. Reviewed tri-fold brochure which field personnel are trained on. Emphasis on safety first prior to jumping into emergency situations (due to Midvale lessons learned).

Ignition sources emphasized as well as proper PPE.

No changes to emergency restoration plan.

Question #12.

Were any changes to emergency plans satisfactory?

12. Result

Satisfactory

12. Notes

No issues.

INTEGRITY MANAGEMENT PROGRAMS

Question #13

Were there changes to the Integrity Management programs (TIMP, DIMP or both, as applicable)?

13. Result

Satisfactory

13. Notes

TIMP updates -

July 2020 update for part 1 of Mega rule

Incorporated process for indentifying MCA's into existing HCA process

Added requirement for intergrity assessments outside of HCA's

Additional assessment methods - guided wave, direct examination for assment method.

Material Property verification while performing direct assessments.

Spike Hydrostatic pressure testing.

DIMP updates -

Minor wording additions, no update required

Appendix B updated

Section 5 wording updated to include emerging and interactive threats.

Question #14.

Is the DIMP/TIMP up to date? What are the results of the operator's program review (effectiveness evaluation) (DIMP every 5 years)?

14. Result

Satisfactory

14. Notes

DIMP -

Evaluation of DIMP indicated that current additional and accelerated actions are effectively mitigating system risks.

2020 continuing surviellance data trending and SME review validation, DIMP is still effectively mitigating risk in distribution system.

TIMP -

Disbonded coating has been identified on the North Midway and Sumas main segments. Robotic ILI was introduced as tool and this lead to discovery, No preventative or mitigative measure are recommended at this time.

Question #15

Are IMP program changes acceptable?

15. Result

Satisfactory

15. Notes

Yes, no issues or concerns with IMP changes.

Question #16

Was appropriate assessment/ repair work conducted during the past year? (monitor progress of IMP activities)

16. Results

Satisfactory

16. Notes

DIMP -

Active leak reduction program; 2020 actual was 185 and 2020 planned was 175

Bridge and slide program; 2020 actua wasl 12, 5 year average was 19

Buried Meter 6,000 remediated, 16,000 new reports

Damage Prevention Program - 832 excavation damages, 5 year average 974

PRP remediations (see prp)

TIMP -

TIMP 2020 assessments - North Midway HCA - Validation digs (no corrosion found) , electrical survey (7 &8)

TIMP 2020 - ILI for Sumas

TIMP 2019 - robotic ILI performed on North Midway (HCA 6). Green river bridge at West pier 30% corrosion wall loss. Confirmed depth, suitable for monitoring, planning for 2021 clockspring repair.

Question #17

Does the operator's HCA location data correspond to the positional data located in UTC GIS?

17. Results

Satisfactory

17. Notes

no issues.

Question #18

What assessment work is planned for the upcoming year?

18. Results

Satisfactory

18. Notes

2021 Sumas ILL direct examinations
Lynnwood / Greenwood ILL validation digs to be performed in late 2021 or early 2022.
North Midway - two bridge repairs due to wall loss.

Question #19
Within the operator's DIMP, are low pressure systems evaluated for overpressure threats?

19. Results
Satisfactory

19. Notes
Based on SME review, PSE re-evaluated its low pressure system's risk and implemented several changes. Low pressure systems in Everett and Tacoma were retired and the low pressure system in Seattle was bolstered with a redundant over pressure protection device. Seattle is approximately 4.2 miles and 79 services.

Question #20
Did the operator develop and follow specific procedures for low pressure system construction or maintenance projects? (Note: this question is revisited in greater detail in the ADB review section)

20. Results
Satisfactory

20. Notes
Developed new procedures GOS 2525.2900, Section 3.7, with 200 feet of any pressure limiting device requires approval by engineering manager.

Question #21
Are plastic pipe and components that have shown a record of defects/leaks being mitigated through the DIMP plans?

21. Results
Satisfactory

21. Notes
Cellcon cap program - replaced as found even if not leaking
Older vintage PE pipe program - mitigating with DIMP program and PRP
Bolt on Tee - past leak issues have led to implementation of stoppage of bolt on tees unless approved by engineering. Working on replacing them as found.

Question #22
Has appropriate DIMP remediation work occurred during the past year? (monitor progress of DIMP activities)

22. Results
Satisfactory

22. Notes
Active leak reduction program; 2020 actual was 185 and 2020 planned was 175
Bridge and slide program; 2020 actual was 12, 5 year average 19
Buried Meter 6,000 remediated, 16,000 new reports
Damage Prevention Program - 832 excavation damages, 5 year average 974
PRP remediations (see prp)

Question #23
What DIMP remediation work is anticipated for upcoming year?

23. Results
Satisfactory

23. Notes
Active leak reduction - 375 B and C repairs
Dupont remediation - 19 miles
Sewer Cross bores - 7300 segments to be cleared
Buried meter remediation - 7,000 buried meters
Above ground meter sets - 1495 meters to be replaced
DR's to remediate - 25
Bridge's to remediate - 14
Older STW main remediation - 2 miles
WSSAP - 80 services

OQ PROGRAM

Question #24
Is the OQ program up to date? Were there changes to the Operator Qualification (OQ) program in the last year? If yes, please describe.

24. Results
Satisfactory

24. Notes
Added ASME B31 OQ standards to manual
Reviewed July 2020 OQ plan.
New Appendix A with new tasks.
Updated intervals for ELM contractor requalifications (locating) from 3 years to 1 year.
Will be switching from CTS OQ numbers to ASME as new qualifications are completed. (Phasing out CTS standards)

Question #25
Are the OQ plan updates satisfactory?

25. Results
Satisfactory

25. Notes
Yes. Operator OQ updates appear to be satisfactory.

Question #26
Are personnel performing covered tasks (including contractors) properly qualified and requalified at intervals determined in the operator's plan?

26. Results
Satisfactory

26. Notes
Reviewed contractor OQ programs during Snohomish County Audit in 2021.

PUBLIC AWARENESS PROGRAM

Question #27
Is the PA program up to date? And were there changes to the Public Awareness (PA) program within the last year?

27. Results
Satisfactory

27. Notes

PA audit was conducted in 2021 or 2020. No issues or areas of concern were discovered.

Question #28

Are changes to the PA program satisfactory?

28. Results

Satisfactory

28. Notes

Yes. Operator changes to PA program appear to be satisfactory.

CONTROL ROOM PROGRAM

Question #29

Is the CRM program up to date? And were there changes to the Control Room Management (CRM) program within the last year?

29. Results

Satisfactory

29. Notes

CRM audit was conducted in September 2021. Two Probable violations and seven areas of concern were noted. Outstanding items are being corrected and will bring CRM program into compliance.

Question #30

Are the CRM program changes satisfactory?

30. Results

Satisfactory

30. Notes

Yes. Changes made to CRM program appear to be satisfactory.

SAFETY MANAGEMENT SYSTEM API 1173

Question #31

Is the operator developing and implementing an API 1173 Safety Management System?

31. Results

Satisfactory

31. Notes

Yes. GAP assessment in 2020 for all ten required elements. Implementation is scheduled for 2022 for PSMS. Currently at level 3 maturity (improvements are in place and approved by stakeholders).

INSPECTOR ASSESSMENT OF INSPECTION UNITS

Question #32

Are inspection units broken down appropriately? Do you recommend any changes to inspection units?

32. Results

Satisfactory

32. Notes

No recommended changes.

Q32: List of current inspection units

Unit Name	Distribution/Transmission	Intrastate or Interstate?	GAS or LIQUID
Puget Sound Energy (13 Units)			
PSE - HQ	Distribution	Intrastate	Gas
PSE - King Co. East	Distribution	Intrastate	Gas
PSE - King Co. West	Distribution	Intrastate	Gas

OPERATOR'S PUBLIC WEB PAGE

Question #33

For informational purposes: Using the drop down selections available in the "Results" block, indicate whether the operator's web page contains the information listed by placing a check in the box adjacent to all items that are present.

33. Results

Q33.A Pipeline Purpose and Reliability ; Q33.B Damage Prevention ; Q33.C Pipe Location Information ; Q33.D How to get additional information ; Q33.E National Pipeline Mapping System ; Q33.F On Call Requirements ; Q33.G Potential Hazards ; Q33.H Prevention Measures ; Q33.I Leak/Damage Recognition ; Q33.J ROW Encroachment ; Q33.K Pipeline Location Information ; Q33.L Integrity Management Programs ; Q33.M Emergency Preparedness

33. Notes

No issues discovered during review.

ADVISORY BULLETIN REVIEW

Question #34

Is there potential for damage to the operator's pipeline facilities caused by flooding, river scour, or channel migration?

ADB 2019-01

ADB 2019-01 Flood Mitigation

34. Results

YES

34. Notes

Possibility exists but it very low impact.

Question #35

If "YES" to Q34, did the operator take appropriate action in accordance with the guidance contained ADB 2019-01? Discuss ADB's guidance with operator's representative, and annotate any concerns.

ADB 2019-01

ADB 2019-01: Flood Mitigation

35. Results

Satisfactory

35. Notes

River and bridge crossings are compared to US. Geographic slide maps and PSE personnel are dispatched during and after rain events to monitor specific areas.

Question #36

Is there potential for the operator's system to be damaged by earth movement or other seismic/geological activities?

ADB 2019-02

ADB 2019-02: Earth Movement/Geological Hazards

36. Results

YES

36. Notes

Slides and seismic earth movements are potential risks.

Question #37

If "YES" to Q36, did the operator take appropriate action according to ADB 2019-02? Discuss suggested actions from ADB with operator's representative and annotate any concerns.

ADB 2019-02

ADB 2019-02: Earth Movement/Geological Hazards

37. Results

Satisfactory

37. Notes

Slide areas are marked and monitored. Maps are notated so known problem areas are avoided if it possible. Geological engineers (Golders and Associates) are consulted with for design and maintenance of pipeline assets. Curb valves are sometimes utilized in areas where service lines might run through problem areas.

Question #38

Does the operator have any indoor meter sets or regulators in their system?

ADB 2020-01

ADB 2020-01 Inside Meter Sets

38. Results

YES

38. Notes

Inside regulators 636, inside meters 8,400

Question #39

If operator's system has indoor meter sets/regulators, did the operator review ADB 2020-0115? Discuss ADB guidance with operator's representative and annotate any concerns. Particular attention must be given to the operator's plan to conduct leak surveys, AC inspections, and other maintenance activities in locations that are difficult to access, as well as the inclusion of inside meters/regulators within the operator's DIMP plan, as applicable.

ADB 2020-01

ADB 2020-01 Inside Meter Sets

39. Results

Satisfactory

39. Notes

Hard to reach program.

Also part of DIMP program (low risk model)

Operator takes every opportunity to move meters outside when possible.

GOS 4625.1150 - inside service leak survey procedure

Question #40

Is the operator's record of locations for all indoor meter sets/regulators within their system complete and sufficiently detailed??

ADB 2020-01

ADB 2020-01 Inside Meter Sets

40. Results

Satisfactory

40. Notes

SAP records provide functional location of each inside meter and regulator. No GIS map of inside meter sets.

Question #41

Does the operator have any low pressure systems?

ADB 2020-02

ADB 2020-02 Low Pressure Systems

41. Results

YES

41. Notes

Seattle low pressure system - 4.2 miles 79 services,

Retired Everett and Tacoma systems in 2019.

Question #42

If "YES" to Q41, did the operator review ADB 2020-0025 for Overpressure Protection of Low-Pressure Natural Gas Distribution Systems? Review ADB guidance with operator and annotate any concerns.

ADB 2020-02

ADB 2020-02 Low Pressure Systems

42. Results

Satisfactory

42. Notes

System is protected by monitor regulators and liquid seals which are full capacity reliefs (double protection)

Operator spent considerable time and resources reviewing Merrimack incident and implementing recommendations of ADB.

Question #43

For low pressure construction/maintenance projects, does the operator have a process for review of engineering plans and constructibility reviews that are carried out through all applicable departments? Do all applicable departments review project plans for accuracy, completeness and correctness? How are control procedures developed that could identify system threats that could result in a common failure mode? How is the operator mitigating risk in their low pressure system?

ADB 2020-02

ADB 2020-02 Low Pressure Systems

43. Results

Satisfactory

43. Notes

GOS 2525.9000, Section 3 - Any construction near a district regulator is required to go through process for engineering design steps.

System is protected by monitor regulators and liquid seals which are full capacity reliefs (double protections).

Question #44

Does the operator include all low-pressure system risks in their DIMP program appropriately?

44. Notes

Yes it is in the risk matrix as a low risk. The overpressure protection and the procedures for working around low pressure system lowers risk level appropriately.

 **SUMMARY OF REQUIRED COMMENTS**

COMMENTS: Required for any ratings other than Satisfactory. Summarize/consolidate entries from the "Notes" blocks above. Ensure you annotate the question number for each comment.
